

# How to Adjust Privacy Settings in Twitter

## Twitter

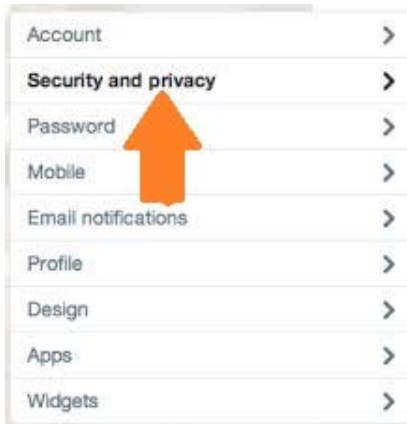

1. Log in to Twitter.

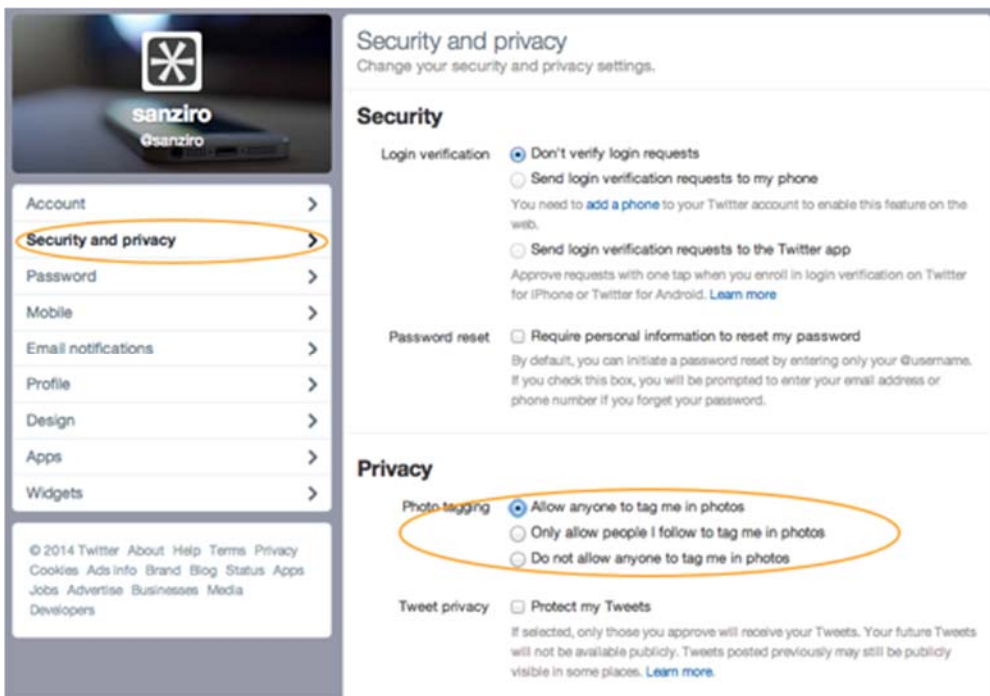

2. Click on the Gear Icon  in the top right hand corner and click “settings”.

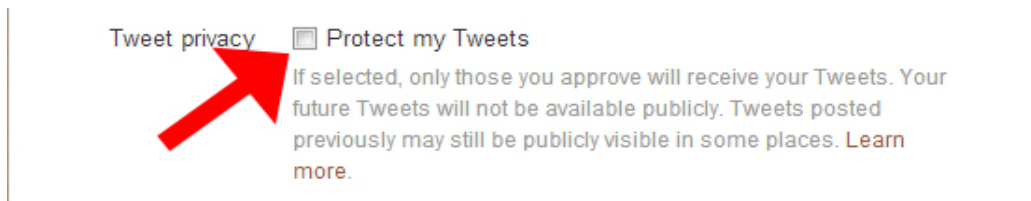

3. Click on the tab labeled “Security and Privacy”

4. Under the privacy section you can manage who can tag you in posts and who can see your posts. Check the “Protect My Tweet” box to make your account private

5. Click the “Protect My Tweets” box if you want to make your account private and only share with your followers.

6. Be sure to click “Save Changes” so the changes will be applied to your account.
